Winter Storm Briefing

Wednesday, December 9th, 2015

- Cold front will move through during the day Friday and be the focus of snowfall.
- Snow expected under the front as it moves across the region.
- Guidance suggesting this front may stall and if this occurs, snowfall rates will increase.
- Generally speaking, heavier snowfall from Wyoming border down to I-70 corridor Friday morning through the evening hours.
- Snowfall shifts to south of I-70 corridor Friday evening into Saturday morning.
- Northern valleys may see 1 to 2 inches of snow.
- All mountain areas may see 6 to 12 inches with some locally higher amounts.
- Most snow will be over by early afternoon Saturday.
- Medium confidence in current forecast though models are now starting to reach better agreement from run to run.
- Another system to bring more snow Monday night into Tuesday.

Storm Total Snowfall by 5PM Friday

Wednesday, December 9th, 2015
